

Specification

Page 8, insert new paragraph after line 5:

As seen in Figure 1A, the speaker motor as described with respect to Figure 1 is attached to a supporting frame 7, an acoustic radiating diaphragm 9 including an air seal 11. A suspending element 13 is also provided.

Amend page 11, paragraph 1 as follows:

Other configurations include, as shown in Figure 12, a laminated top plate assembly with the top plate designated as 34, the magnet 36, the pole piece and back plate 38 and the voice coil as 40. Similar numerical designations are used in Figure 13, [a triple gap specie]; Figure 14, with dual split gaps; Figure 15 with a radial split gap, including nonferrous spacers 37; Figure 16, with an external rebate pole piece; and Figure 17 with a filled split gap, wherein 42 is a nonferrous electrically conductive material.

Page 11, line 19, the term "Ovoid" is correct.
